

METİN ÇETİN

BACKEND SOFTWARE ENGINEER

Izmir, Türkiye | +90 554 998 92 04 | metincetin1996@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Backend-focused Software Engineer experienced in data-intensive telecom systems, performance optimization, asynchronous processing, caching, SQL-heavy workflows, and application modernization. Strongest production stack includes C#/.NET, Entity Framework, Oracle SQL/PostgreSQL, RabbitMQ, Redis, REST APIs, and large-scale data processing.

TECHNICAL SKILLS

Backend: C#, .NET, .NET Core, ASP.NET Core Web API, Entity Framework / EF Core, Node.js, Express.js, NestJS

Data: Oracle SQL, PostgreSQL, MSSQL, MongoDB, SQL, Stored Procedures, Code First

Messaging & Cache: RabbitMQ, Redis

Architecture & APIs: REST, Microservice Architecture, SOA, Layered Architecture, OOP, SOLID

Supporting Frontend: Angular, Vue.js, JavaScript, TypeScript, jQuery | Tools: Git, Cursor, Claude Code

PROFESSIONAL EXPERIENCE

INNOVILE | Fullstack Software Developer Dec 2022 - Aug 2025 | Izmir

- Owned backend and data-access development for the Focus project, rebuilding the application from scratch on a management-selected .NET Core target for telecom planning, optimization, reporting, and operational workflows.
- Worked with reports containing millions of rows and hundreds of columns, developing query, processing, export/import, job, and work-order flows where performance and data-volume constraints were primary engineering concerns.
- Developed and debugged functionality across nearly all 100+ Configuration Manager modules, individually and collaboratively, covering data access, business logic, maintenance, and production issue resolution.
- Used RabbitMQ to route heavy operations by priority to background services and Redis to cache repeated high-volume computations on controlled refresh intervals, materially improving processing speed.
- Contributed to a company-wide DB First to Code First migration initiative, reducing repetitive model/database maintenance work and standardizing data-access development across projects.

EARGE TECHNOLOGY | Fullstack Software Developer Jan 2022 - Aug 2022 | Izmir

- Implemented B2B application modules and data flows on the OpenDev platform using MSSQL, Stored Procedures, JavaScript/jQuery, and Vue.js.
- Strengthened end-to-end input validation and defensive data-handling practices across UI, service, and database-facing operations.

INNOLIFE Mechatronics & Engineering | Software Engineering Intern Jan 2021 - Jun 2021 | Izmir

- Built mobile and web-admin functionality with React Native and Angular, gaining practical experience integrating client applications with backend services.

INDEPENDENT ENGINEERING

Builds utility scripts and advances personal projects through controlled AI-assisted development workflows, using tools such as Cursor, Claude Code, GitHub Copilot, Ollama, and Gemma.

EDUCATION

B.Sc. Software Engineering - Manisa Celal Bayar University, 2017-2021 | GPA: 3.05/4.00

English: Professional working proficiency
