

METİN ÇETİN

FULL-STACK SOFTWARE ENGINEER

Izmir, Türkiye | +90 554 998 92 04 | metincetin1996@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with hands-on ownership across data-intensive telecom platforms, management applications, backend services, and frontend modernization. Experienced in C#/.NET, Angular, Vue.js, JavaScript, Oracle/PostgreSQL/MSSQL, RabbitMQ, and Redis, with a strong focus on performance, maintainability, and end-to-end delivery.

TECHNICAL SKILLS

Backend: C#, .NET, .NET Core, ASP.NET Core Web API, Entity Framework / EF Core, Node.js, Express.js, NestJS

Frontend: Angular, Vue.js, React.js, React Native, JavaScript, TypeScript, jQuery, SCSS, HTML/CSS

Data & Integration: Oracle SQL, PostgreSQL, MSSQL, MongoDB, Stored Procedures, RabbitMQ, Redis, REST

Engineering: OOP, SOLID, Layered Architecture, Microservices, SOA, Code First, Git

PROFESSIONAL EXPERIENCE

INNOVILE | Fullstack Software Developer Dec 2022 - Aug 2025 | Izmir

- Owned end-to-end development of the Focus project, rebuilding the application from scratch on a management-selected .NET Core target and delivering backend, data-access, and application functionality for telecom planning and optimization workflows.
- Developed telecom signal/data optimization, intelligent field-planning and scaling software, and CRUD-based management applications operating on reports with millions of rows and hundreds of columns.
- Implemented and maintained report, job, export/import, and work-order flows across interconnected modules; contributed development and bug fixes across nearly all of the 100+ modules in Configuration Manager.
- Optimized data-intensive operations using Oracle SQL/PostgreSQL, RabbitMQ-based priority processing for long-running background jobs, and Redis caching for repeated high-volume workloads, producing substantial runtime improvements.
- Worked on a company-wide transition from DB First to Code First as part of the assigned migration team, reducing repetitive database/model maintenance effort across projects.

EARGE TECHNOLOGY | Fullstack Software Developer Jan 2022 - Aug 2022 | Izmir

- Delivered customer-requested modules for B2B applications on the OpenDev platform using Vue.js, JavaScript/jQuery, MSSQL, and Stored Procedures across frontend and backend flows.
- Applied input validation and defensive data-handling from UI to database-facing operations, gaining strong experience in protecting and validating user-supplied data.

INNOLIFE Mechatronics & Engineering | Software Engineering Intern Jan 2021 - Jun 2021 | Izmir

- Developed a React Native mobile application and Angular web admin panel with emphasis on readable, maintainable frontend implementation.

INDEPENDENT ENGINEERING

Builds utility scripts and advances personal projects through controlled AI-assisted development workflows, using tools such as Cursor, Claude Code, GitHub Copilot, Ollama, and Gemma.

EDUCATION

B.Sc. Software Engineering - Manisa Celal Bayar University, 2017-2021 | GPA: 3.05/4.00

English: Professional working proficiency
