PROFESSIONAL EXPERIENCE

INNOVILE | Fullstack Software Developer Dec 2022 - Aug 2025 | Izmir

- Developed and supported production telecom applications spanning data-intensive .NET services, management interfaces, reporting workflows, and operational modules.
- Worked on performance-critical flows over millions of rows, using RabbitMQ for prioritized background processing and Redis caching for repeated high-volume operations.
- Contributed to application modernization, production bug fixing, and large multi-module systems, strengthening API, data, and service-layer experience directly applicable to mobile-connected products.

EARGE TECHNOLOGY | Fullstack Software Developer Jan 2022 - Aug 2022 | Izmir

- Built customer-requested B2B modules with Vue.js, JavaScript/jQuery, and MSSQL, applying input validation and defensive data-handling throughout frontend-to-backend flows.

INNOLIFE Mechatronics & Engineering | Software Engineering Intern Jan 2021 - Jun 2021 | Izmir

- Developed a React Native mobile application and Angular web admin panel, focusing on maintainable client-side implementation and application integration.

SELECTED MOBILE PROJECTS

DENETCIAPP - Mobile application for inspection officers to create, record, and review reports and official records. Tech: React Native, Redux, JavaScript, Firebase

GREENBIN - Mobile application with a reward mechanism supporting recyclable-material collection and reuse. Tech: React Native, Redux, Firebase

INDEPENDENT ENGINEERING

Builds utility scripts and advances personal projects through controlled AI-assisted development workflows, using tools such as Cursor, Claude Code, GitHub Copilot, Ollama, and Gemma.
